

NORTHERN PLUMBING SUPPLY

Part# 555C universal flush valve repair kit

Only Fluidmaster has toilet flappers with built-in Microban® protection. The Microban® protection keeps the flapper cleaner by fighting flapper breakdown due to bacteria on the flapper itself. Fix a deteriorated flush valve seat without dealing with any messy glue or removing the tank with the 555C Flush Valve Repair Kit. It's easy to install the 555C, just peel the protective paper off the sealant ring then stick it right on top of an existing flush valve seat. The 555C includes the 502 Universal PerforMax® High Performance Flapper which is best for use in 1.28 - 3.5+ gallon per flush toilets. The 502 has a solid frame for ultimate reliability. Flappers with a solid frame do not twist and provide the best seal. Replace or fix your toilet flapper with a Fluidmaster toilet flapper.

- Built-in Microban® fights flapper breakdown due to bacteria on the flapper itself
- Universal Fit - Best for 1.28 - 3.5+GPF toilets
- Adjustable dial allows for maximum performance and water savings
- Repair deteriorated flush valve seats without removing tank
- No messy glue, just peel and stick!
- Chlorine and hard water resistant
- Solid frame for ultimate reliability
- Easy to install
- 5-year warranty
