

NORTHERN PLUMBING SUPPLY

Part# PRO57K flush valve kit

One of the most important parts of a toilet is the flush valve. A bad flush valve means your customer is losing water. Give them a PRO flush valve with a PRO57K. Made from durable ABS plastic, the PRO57 is made to last in any water conditions. It also comes with a PRO55 flapper, which can be adjusted for optimal water volume. The PRO57K also includes solid brass bolts and a tank to bowl gasket, giving you everything you need for a successful installation.

- Everything needed for a complete flush valve replacement
- Includes PRO55 adjustable flapper with float
- Includes flush valve, flapper and tank to bowl hardware and gasket
- Makes future repairs easy, simply snap on Flapper Model 500, 501, 502 to replace
- Saves water, stops leaks at the drain
- Fits most tanks
- Easy to install
- 5-year warranty
