

NORTHERN PLUMBING SUPPLY

Pro Series Faucet Water Supply Connectors

Pro**

No other connector on the market comes close to the toughness of a Fluidmaster PRO Series connector. Made of a tough polymer core encased in braided stainless steel wire, these connectors go above and beyond what's required by code. Backed by a 10-year warranty, these connectors are only found where other PRO Series products are sold.

- 10-year warranty
- Braided stainless steel lengths range from 9" to 48"
- Ample inside diameter for high flow capacity
- Won't kink or crease, even in the tightest of spaces

* Please note that Fluidmaster's 8F tapered sleeve compression connectors are for direct connection from faucet to angle stop only. Do not use as extension. Male threads are for connection to copper tubing only. Fluidmaster will not be responsible or liable for improper use of this product.
