TECHNICAL SPECIFICATIONS

Hot water supply required

Should be 70% of water capacity of tub or greater.

Turbine

Access to the pump must be at least 18" X 22". Standard connection is a 20 A. 120 V, 60hz, dedicated line with a Ground-Fault Circuit Interrupter (GFCI). With the Geysair, a second dedicated line, GFCI protected, 15A. 120 V, 60 hz is needed for the WarmTouch-Shell and additional options. Air vent is necessary: 2" X 4" minimum.

Our products must be installed by certified professionals only and according to our Owner's Manual as well as federal, provincial/state and local building codes and regulations (www.bainultra.com/documentations).

Approx. shipping weight

290 lbs

Turbine power

755 W

The specifications shown indicate the outer edge dimension and the inside bathing capacity dimension measured at air jets' height. The manufacturer accepts a 1/4" [0.64 cm] variance. There are variations on each product and specifications are subject to change as we improve upon our product as required. The dimensions needed for site preparation and structure building will differ. BainUltra® assumes no responsibility for preparatory work done prior to the product being on site.
