- compact
- lightweight
- versatile

Portable softening systems  
for plumbing and HVAC professionals

Brassmaster Specialty Treatment Systems Boiler Feed Softeners provide a portable, economical means for plumbers and HVAC technicians to supply a softened, scale-free initial fill of water to residential and commercial hydronic systems.

## Features:

- 3/4" garden hose connections with inlet/outlet strainer basket.
- High quality, easily replaceable, synthetic cation resin.
- Hardness level test strips, 2 gpm outlet flow restrictor, and easy-to-use chart for calculating capacity remaining.
- 1-year limited tank and fitting warranty.

Water Hardness (grains per gallon)	Total Gallon Capacity
5	2100
10	1050
15	700
20	525
25	420

## Specifications\*

Model:  
STS-600

Catin resin volume	0.5 ft <sup>3</sup>
Max flow rate (gpm)	2
Iron capacity (ppm)	1**
Mineral tank dimensions	8" x 18"
Overall height	23"
Inlet/outlet pipe size	3/4" hose
Approx. shipping weight (lbs)	27

\* Larger units available – call for details

\*\*1 ppm iron = 4 grains additional hardness

Model STS-600-RM represents a remanufactured/recharged unit.

Note: certain boiler manufacturers may not recommend softened water. Always refer to boiler instruction manual before filling.

## EXCHANGE PROGRAM

Upon media exhaustion, return to distributor for core credit towards a remanufactured, recharged unit.

Call your local BrassMaster distributor for details.
