

### Product Information

Applicable valve:	
3/4" thermostatic mixer - with volume control	K-670-KS
1/2" thermostatic mixer - with volume control	K-680-KS

### Installation Notes

Install this product according to the installation guide.

The K-670-KS and K-680-KS thermostatic mixer valves include one volume control for shower-only installations. For bath and shower installations, an additional K-671-K or K-681-K volume control valve is required for the bath outlet.

An NPT plug must be installed in any unused outlet.

The lower port of the thermostatic mixer is intended for use with a bath spout only. If a bath spout is not used with this product, the lower port must be plugged.

For installations with a diverter spout, a K-9663 twin ell is required between the valve and the spout. A plug must be installed in the lower port of the valve and the supply to the K-9663 twin ell should run from the top port.
