Instant Hot & Cold Water Dispensers with Heating Tank Included - the perfect addition to your kitchen!

The Little Gourmet® Francis Anthony Mini Instant Hot & Cold Water Dispenser features 1/4 turn handles for both the hot and cold water side. Available in multiple styles and finishes, you will be able to find the perfect faucet design to match the look of your kitchen!

- These no lead faucets are only compatible with The Little Gourmet® heating tank (MT641)
- 1-3/16" minimum to 1-3/8" maximum mounting hole required
- Not for reverse-osmosis filtration applications

The Little Gourmet® hot water tank provides 60 cups of 190 degree water per hour - instant hot or cold water for all your cooking needs is right at your fingertips!

Have you ever thought about how often you use hot water or spend waiting for it to heat up? Just imagine having piping hot water in an elegant or modern fixture right at your fingertips. With the Little Gourmet®, you can spend less time waiting and more time cooking, and therefore, more time living. The Little Gourmet® heating unit hides underneath your sink cabinet while the fixture of your choice adds personality and ambiance to your perfect kitchen space.

Whatever your taste, there is a faucet and finish to match beautifully - one that can provide the hot water feature you will wonder how you ever got along without. With a myriad of uses with hot water available in an instant, life just got easier with the Little Gourmet®.

Uses for The Little Gourmet®:

- Cook faster - begin with close to boiling water
- Quickly loosen jar lids
- Remove labels from bottles
- Clean cheese graters and other items in a flash
- Warm baby food and bottles
- Remove wax from candle holders
- Quick pain relief - create a hot compress
- Make a fast double boiler to melt chocolate
- Warm cooking utensils like an ice cream scoop

Features:

- Reverse osmosis compatible
- 1300w power
- Energy efficient (less than a 40w light bulb)
- 2.5 quart tank size
- 3 year warranty
- Indicator light
- Stainless steel housing
- Sensor that prevents dry start-up
