Installation Notes

Install this product according to the installation guide.

Product is designed to be used with a single-handle mixer valve with an escutcheon cover not to exceed 7-3/4" (197 mm) in width.

To be ADA compliant, install according to the requirements of the Americans with Disabilities Act (ADA). Use only ADA compliant components.

Studs should be positioned roughly as shown.

Bath cannot be installed without the wall surround.

The width of the module gets 5/8" (16 mm) narrower at the back. Furring strips (approximately 1/4" (6 mm)) should be used at the back corner studs if drywall will overlap the nailing flange.
