

HEAT PUMP PADS

Heat Pump Pad™

The Heat Pump Pad™ provides an effective base for heat pump equipment installed in snowy climates. Rather than a combination of a typical 2" (or 3") equipment pad and 6" heat pump risers, the Heat Pump Pad™ provides a full 8" of elevation in two simple footprints. The star pattern of the integral risers allow for installation of equipment with different size footprints up to 36" X 36". Included with the Heat Pump Pad™ are eight anti-vibration pads uniquely designed to fit into the guide slots on the top of the integral risers. The base of the Heat Pump Pad™ is sloped outward to allow for easy drainage of condensate or defrost cycle condensate when the outdoor coil is operating in heat pump mode. The Heat Pump Pad™ easily nests allowing for efficient shipping, transportation, and warehousing. Injection molded from concrete gray, recycled polypropylene material, the Heat Pump Pad™ is friendly to our environment, and designed to last longer than the equipment it supports. Patent(s) pending.

HP3636-8	36" x 36" x 8"	EA	16

About DiversiTech

DiversiTech Corporation is North America's largest manufacturer of equipment pads and a leading manufacturer and supplier of components and related products for the heating, ventilating, air conditioning, and refrigeration (HVACR) industry.

Headquartered in the Atlanta, GA metropolitan area, DiversiTech manufactures a suite of products which includes a wide range of mechanical, electrical, chemical, and structural parts for HVACR and electrical systems, and swimming pool installations. The company maintains manufacturing and distribution facilities in key U.S. locations, Europe, and in the Far East. DiversiTech has enjoyed a continued history of successful growth and has acquired industry-recognized names including Devco® Enterprises, Wagner® Manufacturing, The Black Pad®, Hef-T-Pad™, and Specialty Chemical.

Stackable!

Ideal for snowy climates, the new DiversiTech Heat Pump Pad™ is the perfect solution for protecting equipment and ensuring proper operation year round. The Heat Pump Pad™ provides a full 8" clearance from ground level in two compact square footprints. Included with every Heat Pump Pad™ are 8 anti-vibration pads, specifically molded into slots in the pad to reduce vibration and provide quiet operation of your equipment. The base of the pad is also angled to direct melting snow or condensate away from the unit and pad. Heat Pump Pads are made from recycled polypropylene so they are eco-friendly and are built tough to provide many years of service. These pads also nest together for easier transportation and warehousing.

Each Heat Pump Pad™ includes eight anti-vibration pads stored underneath the pad for shipping. During installation these pads are placed into the special slots on top of the Heat Pump Pad™.
