## PRODUCT SPECIFICATION

Unit shall include bi-level reverse electric water cooler with bottle filling station. VRCTLR8WS shall deliver 8 GPH of $50^{\circ} \mathrm{F}$ drinking water at $90^{\circ} \mathrm{F}$ ambient and $80^{\circ} \mathrm{F}$ inlet water. VRCTLRDDWS shall deliver non-chilled drinking water. Units shall be stainless steel construction and include vandal-resistant pushbutton activation. Cooler shall include vandal-resistant bubbler. Bottle filling unit shall include an automatic 20 -second shut-off timer. Shall include Green Ticker ${ }^{\text {TM }}$ displaying count of plastic bottles saved from waste. Bottle filler shall provide $1.1-1.5 \mathrm{gpm}$ flow rate with laminar flow to minimizes splashing. Unit shall meet ADA guidelines. Unit shall be lead free design which is certified to NSF/ANSI 61 and 372 and meets federal and state low-lead requirements. Unit shall be certified to UL399 and CAN/CSA 22.2 No. 120.

## STANDARD FEATURES

- Vandal-resistant pushbutton activation
- Automatic 20-second shut-off on Bottle Filler
- Quick Fill Rate: 1.1 gpm (VRCTLR8WS); 1.5 gpm (VRCTLRDDWS)
- Laminar Flow provides minimal splash
- Real Drain System eliminates standing water
- Visual User Interface display includes:
- Innovative Green Ticker ${ }^{\text {TM }}$

## COOLING SYSTEM (Models VRCTLR8WS only)

- Compressor: Hermetically sealed, reciprocating type, single phase. Sealed-in lifetime lubrication.
- Condenser: Fan cooled, copper tube with aluminum fins. Fan motor is permanently lubricated.
- Cooling unit: Combination tube-tank type. Self-cleansing. Continuous copper tubing with stainless steel tank. Fully insulated with EPS foam which meets UL requirements for self-extinguishing material.
- Refrigerant Control: Refrigerant R134a is controlled by accurately calibrated capillary tube.
- Temperature Control: Easily accessible enclosed adjustable thermostat is factory preset. Requires no adjustment other than for altitude requirements.

## CONSTRUCTION

- Stainless steel basin with integral drain
- Galvanized structural steel cooler chassis provides structural integrity
- Stainless steel construction bottle filler
- Cooler cabinet is stainless steel construction
- Vandal-resistant bubbler is one-piece, heavy-duty chrome-plated

## WARRANTY

5 Year limited warranty on the unit's refrigeration system. Electrical components and water system are warranted for 12 months from date of installation or 18 months from factory shipment, whichever date falls first.

**Based on $80^{\circ} \mathrm{F}$ inlet water and $90^{\circ} \mathrm{F}$ ambient air temp for $50^{\circ} \mathrm{F}$ chilled drinking water.
++Complies; not third party certified

This specification describes an Elkay product with design, quality and functional benefits to the user. When making a comparison of other producers' offerings, be certain these features are not overlooked.

## IMPORTANT! INSTALLER PLEASE NOTE:

These units are designed and built to provide water to the user which has not been altered by materials in the cooler waterway. The grounding of electrical equipment such as telephone, computers, etc. to water lines is a common procedure. This grounding may be in the building buy may also occur away from the building. This grounding can cause electrical feedback into a water cooler creating an electrolysis which results in a metallic taste or an increase in the metal content of the water. This condition is avoidable by installing the cooler using the proper materials as shown.

## NOTICE:

This water cooler must be connected to the water supply using a dielectric coupling. The cooler is furnished with a non-metallic strainer which meets this requirement. The drain trap which is provided by the installer should also be plastic to completely isolate the cooler from the building plumbing system.

## REDUCE HEIGHT BY 3" FOR INSTALLATION OF CHILDREN'S ADA COOLER

## LEGEND:

A = Recommended Water Supply location. Shut-off Valve (not furnished) to accept $3 / 8^{\prime \prime}$ O.D. unplated copper tube. Up to $3^{\prime \prime}$ ( 38 mm ) maximum out from wall.
$B=$ Recommended Waste Outlet location. To accommodate 1-1/2" nominal drain. Drain stub 2" ( 51 mm ) out from wall.
C = 1-1/2" Trap (not furnished).
D = Electrical Supply (3) Wire Recessed Box Duplex Outlet.
$E=$ Insure proper ventilation by maintaining $6^{\prime \prime}(152 \mathrm{~mm})$ minimum clearance from cabinet louvers to wall.
$F=7 / 16^{\prime \prime}$ (11mm) Bolt Holes for fastening to wall.
NOTE: Installations Must Use Ground Fault Circuit Interrupter. (GFCI)
