### NOTES:

- (4) Based on standard test procedures prescribed by the United States Department of Energy.  
 (5) Net AHRI ratings are based on net installed radiation of sufficient quantity for the requirements of the building and nothing needs to be added for normal piping and pick-up. Water ratings are based on a piping and pick-up allowance of 1.15, steam ratings on an allowance of 1.333. An additional allowance should be made for unusual piping and pick-up loads.
